Aim : 6-month full-time internship (last step before graduation) starting February 2014, preferably working on user experience aspects.

Software engineering experience

- **Mobile apps development**
  Designed several Android responsive apps. Also worked on Windows 8 app conception.
- **Client and server-side web development**
  Skills in engineering web applications using modern frameworks (Symfony 2).
- **Computer science skills**
  Experience in software development, algorithms, data structures.
- **Technical skills**
  Strong experience in Java, C#.NET, C++, PHP, SQL and Javascript.

Work experience

- **September 2012 to February 2013** : *Shopmium, Paris, France*
  Six-month internship as a cross-platform mobile software developer.
- **August 2010 and August 2011** : *LCL (French bank), Neuilly-Sur-Seine, France*
  Summer job in a bank (provided basic customer service).

Diplomas and Education

- **2011 - present** : *Université de Technologie de Compiègne, Compiègne, France* :
  Engineering studies in Computer Science Department. Specialized in knowledge systems and user interfaces.
  Expected graduation, June 2014 : Diplôme d'Ingénieur en Génie Informatique (Master's in Computer Engineering).
- **2009 - 2011** : *Université de Technologie de Compiègne, Compiègne, France* :
  General engineering studies : maths, mechanics, physics, computer engineering.
- **2006 - 2009** : *Lycée (French High School) Van Gogh, Ermont, France* :
  Graduated June 2009, obtained Baccalauréat (final French High School diploma) with emphasis on Maths and Science (with distinctions).

Languages

- **English** : Proficient (European C2 level).
- **Spanish** : Upper intermediate (European B2 Level).
- **German** : A little (European A1 level).

Hobbies and such

- **President of UVweb** *(assos.utc.fr/uvweb)* : UTC's exchange platform. Currently rebuilding the system from scratch.
- **Geek/technophile culture** : Enjoy being up-to-date on cutting edge technology.
- **More personal projects** : check out *masciulli.fr*
